

Haunted Houses

Haunted Houses - Boot Hill Cemetery

What's the tale? Many ghosts circle this cemetery that hosts the spirits of many when the town was booming during the goldrush. It is now home to only a few hundred people. The cemetery has quite a few ghosts... old miners, teenagers, chinese girl and boy, young women and men all float about in this ancient cemetery. If you visit you are sure to have a paranormal experience.

What do we know as fact? Thanks to [this site](#) we know the cemetery has 332 residents. As all cemeteries its residents are passed and because those eternally resting there were brought to the cemetery already dead (or at least you hope) it is more likely the people haunt where they lived.

Thoughts: Cemeteries are not usually the most active places for paranormal activity. Since the people in the cemetery lived their lives elsewhere it is more likely they are haunting where they lived and are familiar with. However, since some cemeteries seem to have paranormal activity we are leaving this "undecided".
