## How-To Open Portals

We are going to cover portals in two realms; astral & spiritual. This is one of our methods that we use and recommend for the general public for opening safe passage portals allowing exploration & discovery. There may be slight variations to these recommendations you will discover on your own as you exercise these. I recommend you read through the entire article before you attempt to open any portals. It is best if you read & be prepared before you start. If you are not familiar with the different realms please reference this article first: [The Different Realms](#)

It's a good idea to start a journal when you are going to explore on a regular basis. This way you can record & see your growth & progress as you journey. It will also help you to remember places you have visited before, entities you have encountered, emotions, feelings, etc. At the least you should have a piece of paper & pen handy to jot down what you experience when you are finished. Opening portals is used for astral travel, connecting with astral or spiritual realm spirits & entities, casting magic & spells, performing rituals and general discovery. You can use any of these methods for these purposes or purposes of your own.

Before you begin make sure you are in a relaxed state of mind and are somewhere you will not be disturbed for a minimum of 30 minutes. I prefer to be organized in my approach to opening portals in the aspect I prefer to assign the different realms different colors that I interact with. For the Astral realm I use the focus colors of pink, purple, blue or green and for the Spiritual realm I use the colors white, red, orange or yellow. A focus color is a term I use to describe the color you will use to focus on as a dot or circle in your mind to open a portal. This helps in giving you a focus point and a visual location of origin.

Portals can be opened different ways and we will cover 3 of the ways for each realm. Everyone will have their preference and most use all 3 methods depending on their situation. You can even use a combination of methods to enhance your experience, such as using an Astral amulet with an invocation to experience varying outcomes. For instance holding an Astral amulet while reciting an invocation may intensify your experience or open different gateways.

### **Astral Realm**

First method: Invocation

An invocation is a sentence or string of sentences written whose words invoke something to happen. The sequence of words and intent behind them is what makes an invocation work. Something, no matter how minute or severe, will happen when an invocation is read outloud or in the mind. For those completely new to the

# How-To

use of invocations it may take reciting it a few times in succession for something to happen but sometimes once is enough.

All of these invocations are for safe passage meaning that you can go into the realm and interact but nothing can follow you through the portal, it is a one-way door. For those unexperienced or who are experienced and want a relaxing time of discovery these portals are optimal. Sometimes these invocations will take you to different places within the Astral realm, other times they act as varying intensities of the same key to the same place within the astral realm; it depends entirely on what you are trying to accomplish in your journey. Relax, have fun and enjoy new discoveries!

Get into a comfortable position, relax in your mind, close your eyes and choose a color to focus on while you recite one of the invocations outloud or in your mind. While you are saying the words envision your color as an orb or dot in the black space, focus on the color and allow it to take shape or move on its own while you are reciting. The color will serve as your opening to the astral realm. As you recite the orb will become an opening, or gateway, for you to enter. To close the portal when you are finished simply open your eyes to sever the connection to the astral realm, the portal will close at the time of your disconnect.

## Invocation, Aurora Gateway

Lightway reach the element of ascension  
Elevate the body to the stars & heavens  
Open the channels to the astral domain  
Undayla miscefor (un-day-lah mee-see-for)

## Invocation, Starfly

Reaches of the realms of possibilities  
Guarded by the powers of the stars  
Bonded to the vast territory of astral dimension  
Provide me passage to her folds

## Invocation, Nightway Moon

Brightly glowing the astral night  
Show me the dawning to the ascended plane  
Lift me to its drawing energy

## Second Method: Focus

The method of Focus is usually the quickest way into the astral realm and is a preferred method of those who are sensitive to astral travel or who are experienced in the invocation method, though some completely new to astral travel have been known to successfully utilize this method their first time. This is when identifying specific colors for each realm comes into handy. You know if you are going to concentrate on a yellow orb that you are opening a gateway to the spiritual realm or if you are envisioning a halo of purple light you are going to enter the astral

realm.

The Focus method is exactly the way it sounds. You are going to focus on a light, halo, orb or area of color as corresponding with your selections and through your trance of concentration will a portal to open for you. The power of willing an action is considerable and when you can harness your own energy and focus it on an action amazing things happen.

With your focus and concentration on the area of light force your energy into the color and outloud or in your mind speak your intention, such as "Open portal to astral realm" or "Open gateay to spiritual realm". Again allow the color to take form, shape or movement as it intends. The portal will open at your demand and you are given safe passage. The portal will close when you open your eyes and disconnect your energy from the effort.

## Third Method: Enchantment

Speaking for the vessels from Creepy Hollows only with enchantments for opening or closing portals we design and cast the vessels to open these portals on your behalf at your behest. If you have a vessel imbued with this capability all you need to do is hold it or have it within a foot of you while you are in a comfortable position, eyes closed and relaxed state of mind and ask the vessel to open the portal for you. Depending on each person the portal can open as an entire vision within your mind, open as small portal of light or other manifestations have been reported. Despite how the portal appears to you it leads to the astral realm.

Vessels from Creepy Hollows do not require an invocation or activation in order to enjoy the attached enchantment. If you prefer to astral travel in your sleep you can leave the vessel within a foot of your bed when you sleep and various portals will open and close while you are in a sleeping state. This is a preferred experience for many collectors.

The portal is closed when you open your eyes and remove your energy from the effort.

If you have a portal vessel from a different vendor please follow their instructions for use.

## Spiritual Realm

### First Method: Connection

Level 1: The easiest way to connect to the Spiritual realm is through the mind. The most common connection is obtained through mere thought-waves. It is a short & temporary connection but when you have a flashing thought of a loved one who has passed or of a spirit that exists on the Spiritual realm it is a connection that creates a temporary portal.

Level 2 Get into a comfortable position & relaxed state of mind and inviting the

# How-To

spirits to contact you. This invitation of good tidings opens a portal for you to reach out into the Spiritual realm and explore. This may manifest through visions of spirits, locations, colors or other visualizations and through those the spirits will contact you. Depending on how much of your energy you put out there depends on the intensity of the energy the spirits will contact you with. Try to maintain a relaxed, easy flow and do not be shy in your adventure among them. You are in safe passage and your putting all your energy behind you will show trust & confidence to spirits.

Level 3 Sit with one of your spirits and ask them to show you their world, to take you into the Spiritual realm or to assist you in creating a connection with another spirit. Have their vessel within a foot of you unless the spirit is bound directly to you. Your bond and trust with them will help you in your efforts. This level of connection is the strongest until you've mastered the aforementioned Level 2.

With all of these levels the portal will close when you open your eyes and remove your energy from the effort.

## Second Method: Invocation

An invocation is a sentence or string of sentences written whose words invoke something to happen. The sequence of words and intent behind them is what makes an invocation work. Something, no matter how minute or severe, will happen when an invocation is read outloud or in the mind. For those unexperienced or who are experienced and want a relaxing time of discovery these portals are optimal. Sometimes these invocations will take you to different places within the Spiritual realm, show you strangers, ancestors or animals, other times they act as varying intensities of the same key to the same place within the Spiritual realm; it depends entirely on what you are trying to accomplish in your journey. Relax, have fun and enjoy new discoveries!

Get into a comfortable position, relax in your mind, close your eyes and choose a color to focus on while you recite one of the invocations outloud or in your mind. While you are saying the words envision your color as an orb or dot in the black space, focus on the color and allow it to take shape or move on its own while you are reciting. To close the portal when you are finished simply open your eyes to sever the connection to the Spiritual realm, the portal will close at the time of your disconnect.

## Fourth Method: Focus

The method of Focus is usually the quickest way into the Spiritual realm and is a preferred method of those who are sensitive to spirits already or who are experienced in the invocation method, though some who feel a closeness to certain spirits (in their collection or not) successfully utilize this method their first time. This is when identifying specific colors for each realm comes into handy.
